

# Comprehensive Revision of Local Area Personal Income, 1969–95

By Wallace K. Bailey

**T**HIS ARTICLE describes the major features of the comprehensive revision of the annual estimates of personal income for local areas for 1969–95.<sup>1</sup> It also presents the revised estimates of personal income and per capita personal income for the local areas for 1993–94 and the new estimates for 1995 (for information on the revised estimates for earlier years, see the box “Data Availability” at the end of the article). These areas consist of counties, metropolitan areas, and BEA economic areas (for more information, see the box “Definitions of Local Areas”).

Comprehensive revisions of the estimates of personal income for States and local areas are made approximately every 5 years to incorporate the changes that result from the comprehensive revision of the national income and product accounts (NIPA’s). The estimates are also revised to incorporate changes in the methodology used for the regional estimates, including the introduction of new source data and improved estimating methods. In addition, newly available State and local area data from regular sources are incorporated; these data consist of both annual data and data that are available less frequently—for example, data from the most recent quinquennial census of agriculture.<sup>2</sup>

The revised estimates of local area personal income reflect the incorporation of the results of the comprehensive revision of the NIPA’s released in January 1996, the annual revision of the NIPA’s released in August 1996, and the comprehensive revision of State personal income released

in September 1996.<sup>3</sup> The incorporation of the revision to the NIPA’s released in April 1997 and of the annual revision of the NIPA’s released in July 1997 into the State and local area estimates will be accomplished during the remaining stages of the comprehensive revisions of these estimates (for further information, see the box “Release Schedule for the Revised Estimates of State and Local Area Personal Income”).<sup>4</sup>

## Changes in source data and methods

This section describes the improvements to the estimates of specific components of personal income that result from the use of newly available and more current source data and from the use of improved estimating methods. For some components, the improvements result from changes that were incorporated into the revisions to the national and State estimates and that could be replicated at the county level. For other components, the improvements result from changes in source data and methods that were made only at the county level.

In addition, the county estimates indirectly reflect the changes in methodology that are part of the revisions to the national and State estimates but that cannot be replicated at the county level, because the source data are unavailable for counties. These changes are incorporated implicitly through the use of the national estimates of about 400 detailed subcomponents of personal income as the control totals for the State estimates, and the State estimates are then used as control totals for the county estimates. For example, the revised national estimates of nonfarm proprietors’ income reflected the use of a new method for

1. For the most recent presentation of the local area estimates before these revisions, see “Local Area Personal Income, 1992–94,” SURVEY OF CURRENT BUSINESS 76 (June 1996): 75–100. For the most recent publication of the historical series, see U.S. Department of Commerce, Bureau of Economic Analysis, *Local Area Personal Income, 1969–92* (Washington, DC: U.S. Government Printing Office, September 1994). An updated edition of this publication is planned for 1998.

2. For a detailed description of the sources and methods used to prepare the estimates of local area personal income, see the methodology under “Documents” on the CD-ROM “Regional Economic Information System, 1969–95” or on BEA’s Web site at <http://www.bea.doc.gov>. This methodology is also included in *Local Area Personal Income, 1969–92* and in a packet of free information (see the box “Data Availability”).

3. See “Improved Estimates of the National Income and Product Accounts for 1959–95: Results of the Comprehensive Revision,” SURVEY 76 (January/February 1996): 1–31; “Annual Revision of the National Income and Product Accounts,” SURVEY 76 (August 1996): 8–12; and “Comprehensive Revision of State Personal Income, 1969–95,” SURVEY 76 (October 1996): 48–93.

4. See “Completion of the Comprehensive Revision of the National Income and Product Accounts, 1929–96,” SURVEY 77 (May 1997): 6–9; and “Annual Revision of the National Income and Product Accounts,” SURVEY 77 (August 1997): 6–35.

calculating depreciation, but State- and county-level source data to calculate depreciation for this component are not available. Accordingly, the amount of the change to the national estimate of nonfarm proprietors' income for each industry was allocated to the States and the State estimates to the counties, in proportion to the related source data for the industry. These data, which are tabulated from the tax returns of sole proprietors and partnerships, are net profits for some industries and gross receipts for other industries.

**Wage and salary disbursements.**—The county estimates of wages and salaries have been improved by the addition of an adjustment for voluntary employee contributions to thrift savings plans, primarily 401(k) plans. These contributions are not fully reported for all States in the Bureau of Labor Statistics tabulations of wages and salaries covered by unemployment insurance (UI), which are the primary source data for the national, State, and county estimates of private-sector wages and salaries. An adjustment to include these contributions was added to the wage and salary estimates in the NIPA comprehensive revi-

sion. The national adjustment, which begins with the estimates for 1979, is attributed to the 19 States that reported to the Bureau of Labor Statistics in 1987 that they had not issued explicit reporting requirements for the contributions. The national adjustment is allocated to those States and the adjustment for each State to the counties, in proportion to the amount of reported wages and salaries for private sector industries.

The 1991–95 county estimates of the wages and salaries paid by railroad companies, which are not covered by the State UI system, were improved by the use of newly available wage data from the Railroad Retirement Board (RRB); previously, the county estimates were based mainly on employment data by place of work. The RRB data represent the wages subject to the payroll tax that supports the railroad retirement system; BEA adjusts these data to reflect the portion of the industry's wages not subject to the tax. In addition, BEA adjusts the RRB data to a place-of-work basis, using journey-to-work data from the 1990 Census of Population, because the RRB data

#### Release Schedule for the Revised Estimates of State and Local Area Personal Income

The comprehensive revision of the State and local area estimates of personal income will be completed with the following releases.

- In September 1997, the revised annual estimates of State personal income for 1958–68 will be released, and the estimates for 1969–96 will be revised further and released. The further revisions will incorporate (1) for 1969–96, the NIPA revisions released in April 1997, which affected only proprietors' income and the rental income of persons, (2) for 1993–96, the annual NIPA revisions released in July 1997, and (3) for 1980–96, changes made only at the State level—mainly to the estimates of Federal civilian wages and salaries and of the adjustment for residence.

- In October 1997, the revised quarterly estimates of State personal income for 1969–89 will be released, and the estimates for 1990 through the first quarter of 1997 will be revised further and released (together with new estimates for the second quarter of 1997). The revisions will incorporate the revisions to the annual State estimates released in September 1997.

- Early in 1998, the revised annual estimates of State personal income for 1929–57 will be released.

- In May 1998, the annual estimates of local area personal income for 1969–95 will be revised further and released (together with new estimates for 1996). The revisions will incorporate the revisions to the annual State estimates released in September 1997.

#### Definitions of Local Areas

The estimates of local area personal income are prepared for metropolitan areas, BEA economic areas, and counties.

The metropolitan areas (table 1) in all States are those defined in terms of counties and county equivalents by the Office of Management and Budget (OMB) for Federal statistical purposes.<sup>1</sup> The metropolitan areas include the redefined metropolitan statistical area (MSA) for Jackson, TN, and the new MSA's for Jonesboro, AR, and for Pocatello, ID, which were defined by OMB in June 1996.<sup>2</sup>

Each of the BEA economic areas (table 2) consists of one or more economic nodes—usually metropolitan areas—and the surrounding counties that are economically related to the node.<sup>3</sup> These economic areas encompass all counties and county equivalents in the Nation.

The counties (table 3) include county equivalents. For Virginia, the estimates are presented for the larger independent cities as well as for most counties; the estimates for the smaller independent cities are combined with the estimates for adjacent counties. The estimates for Shawano and Menominee Counties, WI, are presented for the first time; previously, the estimates for these two counties were combined.

1. For the New England region, OMB's preferred definitions of the metropolitan areas are in terms of cities and towns, but the available data for cities and towns are not sufficient to prepare estimates of personal income.

The list of the metropolitan areas and their constituent counties and county equivalents is available on BEA's Web site at <http://www.bea.doc.gov> and from the National Technical Information Service, Document Sales, 5205 Port Royal Road, Springfield, VA 22161 (703) 487-4650 (Accession No. PB96-180575).

2. The Jackson, TN, MSA now consists of Chester and Madison Counties, Tennessee (Chester County was added in the redefinition). The Jonesboro, AR, MSA consists of Craighead County, Arkansas. The Pocatello, ID, MSA consists of Bannock County, Idaho. See "Revised Statistical Definitions of Metropolitan Areas (MA's) and Guidance on Uses of MA Definitions," OMB Bulletin No. 96-08 (June 28, 1996).

3. For a description of the economic areas and the methodology used to define them, see "Redefinition of the BEA Economic Areas," SURVEY OF CURRENT BUSINESS 75 (February 1995): 75–81. This article and a list of the economic areas and their constituent counties and county equivalents are available on BEA's Web site.

are reported by the State and county of residence of the employees.

The 1992–95 county estimates of the wages and salaries paid by farms and by farm labor contractors are now based on data from the 1992 Census of Agriculture. The 1992 data are used to allocate the State totals for all years because no data are available to extrapolate the data to subsequent years. The 1988–91 estimates are interpolations of data from the 1987 census and data from the 1992 census.

**Farm proprietors' income.**—The 1992–95 county estimates of farm proprietors' income now incorporate data from the 1992 Census of Agriculture, which replace data extrapolated from the 1987 census. The methods previously used to extrapolate the 1987 data to 1988–94 are now used to extrapolate the 1992 data to 1993–95. The 1988–91 estimates now incorporate interpolations of data from the 1987 and 1992 censuses.

**Nonfarm proprietors' income.**—The county estimates of nonfarm proprietors' income for 1990–95 were improved by the use of newly available source data by county from the 1990–93 Federal income tax returns of sole proprietors and partnerships. The previously published estimates were extrapolations of the tax return data for 1989.<sup>5</sup> The methods previously used to ex-

5. The procedure used to incorporate the large national-level adjustments to these data—such as the adjustment for misreporting on income tax returns—is unchanged. The sum of the national adjustments for each industry is allocated to the States and the State adjustments to the counties, in proportion to the source data.

trapolate the 1989 data to 1990–94 are now used to extrapolate the 1993 data to 1994–95.

**Transfer payments.**—The 1988–95 county estimates of the benefits under the medicare program were improved by the incorporation of newly available data from the Health Care Financing Administration (HCFA) on the benefit payments classified by the residence of the beneficiaries. Previously, the county estimates were based on HCFA data that were classified by the location of the health care providers.

### ***Revisions to the 1994 estimates for metropolitan areas***

In general, the effect of the comprehensive revision on the 1994 estimates of personal income for metropolitan areas was small. Of the 10 areas with the largest upward percentage revisions, only 3 areas had revisions of more than 5.0 percent (**table A**). Of the 10 areas with the largest downward percentage revisions, only 3 areas had revisions of more than 3.0 percent.

Most of the areas with the largest percentage revisions are relatively small. In the revised series, they account for only 2.8 percent of the Nation's personal income in 1994; excluding Houston, they account for only 1.3 percent.

The upward revisions were generally larger than the downward revisions, mainly because of the 1.6-percent upward revision to the national estimate of personal income. The upward revision was accounted for by the upward revision to dividends, interest, and rent that reflected a

### **Acknowledgments**

The comprehensive revision of local area personal income was prepared by the Regional Economic Measurement Division under the direction of Robert L. Brown, Chief. Hugh W. Knox, Associate Director for Regional Economics, provided general guidance.

Estimates of nonfarm labor earnings (wages and salaries and other labor income) were prepared by the Regional Wage Branch under the supervision of Sharon C. Carnevale, Chief. Major responsibilities were assigned to Elizabeth P. Cologer, Lisa C. Ninomiya, Michael G. Pilot, John A. Rusinko, and James M. Scott. Contributing staff members were Ann E. Dunbar, Susan P. Den Herder, Lisa B. Emerson, John D. Laffman, Lela S. Lester, Russell C. Lusher, Richard A. Lutyk, Paul K. Medzevian, Adrienne T. Pilot, Mauricio Ortiz, Michael Phillips, William E. Reid, Jr., Victor A. Sahadachny, Elizabeth F. Stell, and Jaime Zenzano.

Estimates of farm earnings (wages and salaries, other labor income, and proprietors' income) and the residence

adjustments were prepared by the Quarterly Income Branch. Major responsibilities were assigned to James M. Zavrel. Contributing staff members were Elaine M. Briccetti, Carrie L. Case, Daniel R. Corrin, Jeffrey L. Newman, James P. Stehle, and Daniel Zabronsky.

Estimates of nonfarm proprietors' income, property income, transfer payments, and personal contributions for social insurance were prepared by the Proprietors' Income Branch. Major responsibilities were assigned to Charles A. Jolley. Contributing staff members were Toan A. Ly, Ellen M. Wright, and Marianne A. Ziver.

The public use tabulations and data files were assembled and the tables for this article were prepared by the Regional Economic Information System Branch. Major responsibilities were assigned to Kathy A. Albetksi and Gary V. Kennedy. Contributing staff members were H Steven Dolan, Michael J. Paris, Albert Silverman, Nancy E. Smith, Callan S. Swenson, Monique B. Tyes, and Mary C. Williams.

large upward revision to the rental income of persons. The national revisions to the other components of personal income were relatively small and almost exactly offsetting.

For the metropolitan areas with the largest upward and downward revisions to 1994 personal income, the revisions are largely attributable to the incorporation of the national revision to dividends, interest, and rent and of newly available county-level source data for proprietors' income and for transfer payments. Downward revisions

to personal contributions for social insurance—reflecting a State-level methodological improvement to the estimates of employee contributions for old-age, survivors, disability, and hospital insurance—contributed substantially to several of the largest upward revisions.<sup>6</sup>

The box "Data Availability" and tables 1 through 3 follow. 

6. Personal contributions for social insurance is subtracted in the derivation of personal income.

1. The revision to personal income as a percent of the previously published estimate.

2. This column shows the components that had revisions that substantially contributed to the revisions to personal income. The amount of the revision for each component is shown as a percentage of the previously published estimate of personal income for the area. The percentage for personal contributions for social insurance is shown with the sign reversed because this component is subtracted in the derivation of personal income.

3. For these areas, substantial upward revisions to dividends, interest, and rent partly offset the downward revisions to the other components.

W&S Wage and salary disbursements

OLI Other labor income

FPI Farm proprietors' income

NFPI Nonfarm proprietors' income

DIR Dividends, interest, and rent

TP Transfer payments

PCSI Personal contributions for social insurance

## Data Availability

Personal income by type of payment, earnings by Standard Industrial Classification (SIC) division, population, and per capita personal income are available for local areas for 1969–95. A version of the table presented below that presents earnings by SIC two-digit industry is also available. Supplemental tables present estimates of employment by SIC division, of transfer payments by program, and of the major categories of farm income and expenses. In addition, one set of tables presents summary estimates of personal income, per capita personal income, and population, and another set presents summary estimates of wage and salary disbursements, wage and salary employment, and average wages per job.

The entire set of the detailed and summary tables for all areas and for all years is available on the CD-ROM "Regional Economic Information System, 1969–95." This CD-ROM also contains the quarterly State estimates of personal income for 1969–96 and for the first quarter of 1997; the estimates of gross state product for 1977–94; the projections of personal income, earnings, and employment to 2045 for States, metropolitan areas, and BEA economic areas; the projections of gross state product to 2045; and a description of the sources and methods used to estimate local area personal income.

The CD-ROM is designed for use with microcomputers equipped with the Windows 3.1 or Windows 95 operating systems, and it includes a program to help users select, display, print, and copy the tables. The price is \$35.00. The product number is RCN-0129.

Each set of the summary estimates for all counties and metropolitan areas is available on a diskette for \$20. The product numbers are RDN-0141 for the personal income set and RDN-0121 for the wage and employment set.

In addition, the following information is available free of charge: A sample packet of all tables, a description of the sources and methods used to prepare the local area estimates, and a list of the members of the BEA User Group—State agencies and universities from which the State and local area estimates can be obtained.

For more information about these products or to request the free information, call BEA's Regional Economic Information System at (202) 606-5360 or FAX (202) 606-5322.

To order the CD-ROM or diskettes, write to the Bureau of Economic Analysis, BEA Order Desk (BE-53), Washington, DC 20230, or call 1-800-704-0415. Visa and MasterCard are accepted for telephone orders.

### Example of Available Data for Local Areas: Personal Income by Major Source and Earnings by Major Industry, 1990–95<sup>1</sup>

<sup>1</sup> Not shown to avoid disclosure of confidential information. Estimates are included in totals.

<sup>2</sup> Less than \$50,000. Estimates are included in totals.

<sup>3</sup> 1990-95 based on 1987 SIC.

<sup>4</sup> Farm income consists of proprietors' net farm income, the wages of hired labor, the pay-in-kind of hired farm labor, and the salaries of officers of corporate farms.

<sup>5</sup> Census Bureau midyear population estimates. Estimates for 1990-95 reflect State and county estimates available as of March 1997.

<sup>6</sup> Personal contributions for social insurance are included in earnings by type and industry but excluded from personal income.

<sup>5</sup> The adjustment for residence is the net inflow of the earnings of interarea commuters. For the United States, it consists of adjustments for border workers: Earnings of U.S. residents commuting outside U.S. borders to work less earnings of foreign residents commuting inside U.S. borders to work and of certain Caribbean seasonal workers.

<sup>6</sup> Includes the capital consumption adjustment for rental income of persons.

<sup>7</sup> Includes the inventory valuation and capital consumption adjustments.

<sup>8</sup> "Other" consists of wages and salaries of U.S. residents employed by international organizations and foreign embassies and consulates in the U.S.

Table 1.—Personal Income and Per Capita Personal Income by Metropolitan Area, 1993–95
